Subject: Cresswind Circuit Breaker Problems Date: Friday June 11, 2021

To whom it may concern,

On Friday June 11, 2021 at approximately 2:45 PM, my house experienced a power outage which lasted approximately 15 minutes.

As a result of this power outage, I had 8 circuit breakers (all Green ETN breakers, see attached photo) that tripped which I had to reset manually. This is an ongoing problem that I have been documenting since my wife and I purchased our home (a new build) in May of 2020.

I live in Cresswind Development in Phase 3.

Charles Berman and Stephen Brooks
2068 Barn Swallow Road
Phase 4

Early April they tripped but I was not here full time April 2-7 is when it happened
Last Friday I believe it was when we lost power and they tripped then also. It was early afternoon.
Four out of five of my blue Eaton 20 amp AFCI circuit breakers tripped both times. They are marked
washer, dishwasher and the other two are marked kitchen.

Thank you Mike

Charlie

Hello Mike,

Today at the pool, I learned that you are collecting names and addresses of those who have breakers that trip whenever there is a power issue. We typically have 5-6 breakers that trip when we lose power, have a power surge, a power brown out, or a flicker in power.

We do not have a generator.

Please let me know if you have additional questions, and good luck with your hearing regarding the issue.

Regards,
Sharon Brennan &

To Whom it may Concern:

On Friday June 11, there was another neighborhood power outage at approximately 2:50 pm which caused 6 of my circuit breakers to trip. My house is in Cresswind Phase 3. There have been multiple such power outages causing breakers to trip over the last 2-3 years. Due to these recurring power problems I had a whole house surge protector installed. However this has not prevented the circuit breakers from tripping.

Mike,

I have had lots of outages resulting in trips over the past year with the lastest on 6/11/21.

During that outage I lost breakers A5, A6, B5, B6, B7, and B13.
A is the left side and B is the right.

There were many outages and trips before I started keeping records.

I can email you a copy of my tracking form that includes more details.

I know dozens of my neighbors by name who have had the same problem with tripping breakers.

It is a trending topic on Facebook here in Cresswind.

Re: circuit breaker popping

During the last power outage on June 11, 2021, we experienced a power outage for about 15 mins. When the power was restored about 3:10PM 3 of our GFI circuit breakers popped in the garage electrical box.

We had to reset manually. This would have been a big problem if we were away for a day or more. It is also a continuous issue.

We reside in Phase 4 of the Cresswind Development/ The Ponds.

Subject: RE: Cresswind Problem of Circuit Breakers Tripping after Power Outage

Sent from my T-Mobile 4G LTE Device

To whom it may concern:

On the afternoon of Jun 11 there was a power outage in Crestwind at the PONDS. The duration was brief but troublesome. Power was restored in about 20 min.

However, 3 of my circuit breakers were tripped, several involved with refrigeration. This is not the 1st time this has happened.

If this happens while we are away, there could be some costly and perhaps safety issues. Please investigate this as a priority. Thanks in advance..
